

SmartSoc[®]

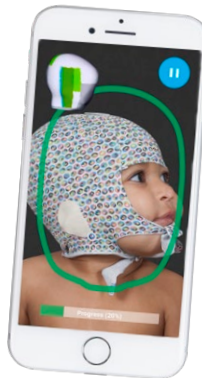

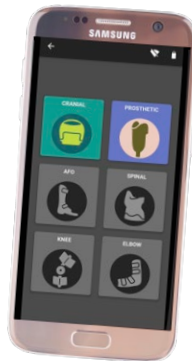

The clinically proven pocket-sized 3D image capturing system.

NEW!

The Apple[®] iPhone[®] and the Prosthetic Module are the latest additions to the SmartSoc 3D Capturing System from Orthomerica. Clinicians now have the freedom to choose where they send their prosthetic scans for manufacturing including Orthomerica, custom fabrication facilities, or their own labs.

SmartCam[™] for fast, safe, and accurate video scans

- Samsung[®] Galaxy S7[®] with Android[™] OS -or- Apple iPhone 7 with iOS[®]*
- User friendly—requires minimal training to use
- Accurate to 0.1%
- Generic model on the device display shows real-time SmartScan[™] progress
- Scanning halo turns green, indicating optimal stand-off distance
- Allows patient movement during a SmartScan
- Portable—easily taken to clinics and satellite offices

CurveCapture[™] App converts 2D video images to a 3D model

- Revolutionary technology analyzes 2D video images for optimal 3D conversion in the cloud
- HIPAA compliant

eBrace[®] web portal

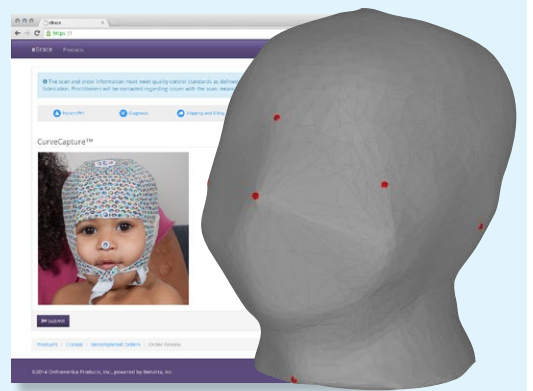

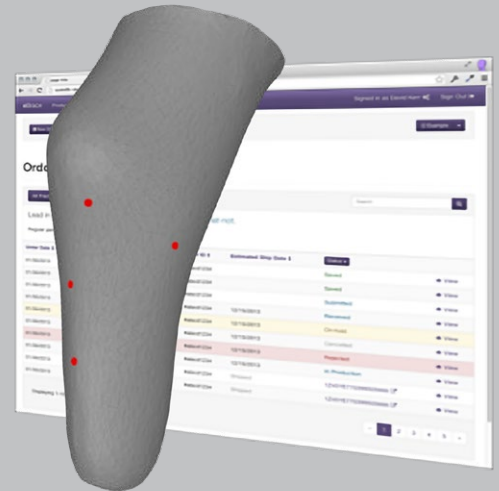

- Allows users to review the 3D Model
- Platform for ordering STAR[®] family of cranial remolding orthoses from Orthomerica and sending prosthetic scans to third-party fabricators

Product offerings

- Prosthetics
- STAR family of cranial remolding orthoses
- Custom protective helmets
- More modules to come!

The SmartSoc System eliminates the need to take messy, expensive, time-consuming, & less accurate plaster casts.

ORTHOMERICA[®]
877-737-8444 | www.orthomerica.com

Key features

- Android™ or iOS® based SmartCam™ loaded with CurveCapture™ software from NetVirta™
- eBrace® ordering software – HIPAA compliant
- Three operating modes
 - WiFi
 - 4G LTE/3G data capable
 - Offline

Product Offerings

- STAR® family of cranial remolding orthoses
- Custom protective helmets
- Prosthetics
- Other modules to follow (lower extremity, spinal)

System starter kit includes

- SmartCam loaded with CurveCapture software
- 1 year software license – valid for two users per SmartCam
- Access to eBrace webportal for ordering
- Camera bag
- 6 registration tags
- 240 anatomical markers

Cranial starter kit includes

- 13 cranial SmartSoc Sleeves (3 sleeves each of SM, MD and L sizes, plus 1 sleeve each of four new sizes: XS, SM/MD, MD/LG and XL)
- Toy light-up fan (for infant distraction)
- Ear covers (50)
- Cranial circumference tape (2)
- Training cranial mold
- 6 registration tags
- 240 anatomical markers

Prosthetic starter kit includes

- 14 prosthetic socks (two of each, sizes 2 through 8)
- SmartCam mirror extension (aids in scanning posterior of residual limb)
- SmartSoc prosthetic training mold and mold stand
- 6 Registration Tags
- 240 anatomical markers
